Cybersecurity that makes sense

Personal guidance and smart tools to protect what matters most in your business

Harmony

Cybersecurity is no longer just for large companies. With new regulations like NIS2 now in effect in Belgium, more and more SMEs are expected to step up their digital protection. But navigating these requirements alone can feel overwhelming. That's where Harmony comes in — combining smart technology with expert guidance to help you take control, at your own pace.

Get a Clear View — and a Concrete Plan

Harmony translates cybersecurity complexity into clarity and action. With the help of smart technology and human expertise, we provide SMEs with a clear picture of their digital risks and a realistic roadmap to reduce them — step by step, at their own pace.

Here's what you can expect from our approach:

Instant insight into your risks and security gaps
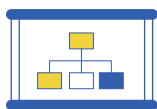

Check for weak spots and hidden vulnerabilities

Tailored advice that matches your legal obligations

Security policies made simple

Action plans you can actually use

Reports for your management or clients

Results with Harmony

60%
Less time spent on cybersecurity guesswork

>40%
Faster risk detection through smart scans

80%
Lower costs on compliance and reporting

2x
More focus on your actual business

Up to 60%
Lower cost than classic consultancy

"You focus on growing your business. We'll keep it secure."

Stephan Van den Eynde, Founder, Harmony
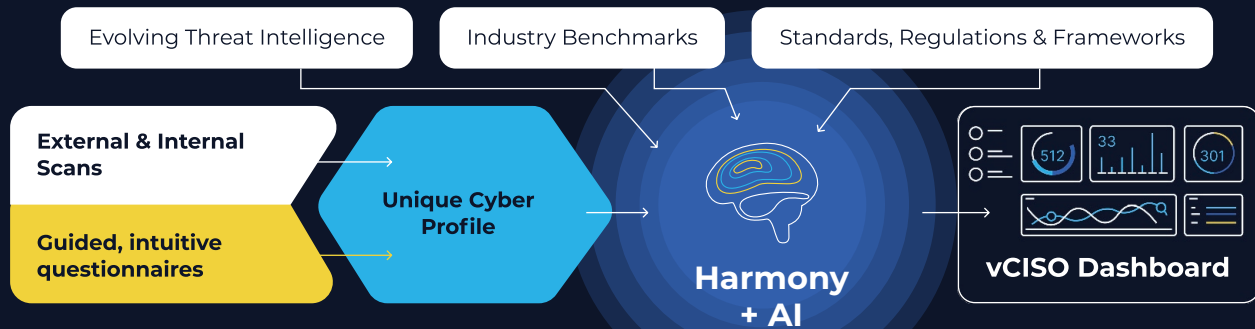

How Harmony Works

Your Cyber View

We create a clear profile of your business — based on interviews, scans and indepth knowledge. This gives us a starting point that reflects your real situation.

Smart Risk Focus

Using AI, we analyse your profile against industry risks and the laws that matter for your business (like GDPR or NIS2). You immediately see where to focus — and what can wait.

Your Roadmap

No endless documents or confusion. You receive clear priorities, concrete actions and practical guidelines. One overview for all your SaaS and digital tools!

Evolving Threat Intelligence

Industry Benchmarks

Standards, Regulations & Frameworks

External & Internal Scans

Guided, intuitive questionnaires

Unique Cyber Profile

Harmony + AI

512 33 301

vCISO Dashboard

Our smart engine processes your business context, risks and regulations — turning it into a clear cybersecurity profile and dashboard that highlight what matters most.

Why Harmony now?

Work More Efficiently

Save time by focusing only on the risks that truly matter. Our approach helps your team take action without needing cybersecurity expertise.

Boost Business Stability

A clear roadmap means fewer surprises. With Harmony, your business becomes more resilient and better prepared for audits or incidents.

Make Smarter Decisions

Our dashboards and reports give you the clarity to act with confidence — whether it's about data protection, supplier risk or compliance.

See Value Fast

In just a few steps, you'll gain insight, structure and peace of mind. We turn complexity into simple next steps you can act on immediately.

"Even in the first month we had a clear view of our risks and a plan that does actually fit our business."
